DETAILED ACTION

Reasons for Allowance

The following is an examiner's statement for the reasons of allowance.

The present invention is directed to an automatic allocation of associated costs with travel related transactions. Independent claims 1 and 17 teach the novel feature of receiving a PNR that includes information related to said agency fee and travel cost related to said travel related transaction and a user profile comprising allocation information, wherein said allocation information defines an travel cost and agency fee to the corresponding first and second billing accounts respectively and determining the agency fee based upon said PNR wherein the agency fee represents an extra charge related to the travel-related transaction in addition to said travel cost and charging each respective account to the agency fee or travel cost.

The following reference has been identified as the most relevant prior art to the claimed invention(s). The prior art relates to automated processing of travel related expenses.

Buchanan (US 6,009,408) teaches automatic processing of travel related expenses (see at least, abstract). Buchanan teaches the use of user profiles to set travelers preferences

Art Unit: 3627

associated with the travel cost (see at least, col. 6, lines 16-35 and col. 6, line 50 - col. 7, line 2) further Buchanan teaches the use of electronic transfer funds from one account to a plurality of providers accounts (see at least, col. 10, lines 40) and finally reporting travel expenses (see at least, col. 12, lines 1-6).

Buchanan neither anticipates nor fairly and reasonably teaches receiving a PNR that includes information related to said agency fee and travel cost related to said travel related transaction and a user profile comprising allocation information, wherein said allocation information defines an travel cost and agency fee to the corresponding first and second billing accounts respectively and determining the agency fee based upon said PNR wherein the agency fee represents an extra charge related to the travel-related transaction in addition to said travel cost and charging each respective account to the agency fee or travel cost. Because the missing features are not found in a reasonable number of references, a person having ordinary skill in the art at the time the invention was made would have not been motivated or found it to be obvious to combine the missing features with Buchanan.

The following reference has been identified as relevant prior art to the claimed invention(s). The prior art providing reservation information related to travel related expenses.

Iyengar (US 6,360,205 B1) teaches a service fee which is associated with the travel agent (see at least, col. 13, lines 30-60).

Iyengar neither anticipates nor fairly and reasonable teaches receiving a PNR that includes information related to said agency fee and travel cost related to said travel related transaction and a user profile comprising allocation information, wherein said allocation information defines an travel cost and agency fee to the corresponding first and second billing accounts respectively and determining the agency fee based upon said PNR wherein the agency fee represents an extra charge related to the travel-related transaction in addition to said travel cost and charging each respective account to the agency fee or travel cost. Because the missing features are not found in a reasonable number of references, a person having ordinary skill in the art at the time the invention was made would have not been motivated or found it to be obvious to combine the missing features with Iyengar.

A foreign reference search was performed however no pertinent foreign reference was identified.

The following non-patent literature has been identified as the most relevant prior art to the claimed invention(s). The prior art mostly relates to a travel expenses and how to better manage the expenses.

AirTran teaches the use of keeping travel expenses separate from one another for easier reconciling (see at least, paragraph 4) and separating air costs from travel costs (see at least, paragraph 4).

AirTran neither anticipates nor fairly and reasonably teaches receiving a PNR that includes information related to said agency fee and travel cost related to said travel related transaction and a user profile comprising allocation information, wherein said allocation information defines an travel cost and agency fee to the corresponding first and second billing accounts respectively and determining the agency fee based upon said PNR wherein the agency fee represents an extra charge related to the travel-related transaction in addition to said travel cost and charging each respective account to the agency fee or travel cost. Because the missing features are not found in a reasonable number of references, a person having

ordinary skill in the art at the time the invention was made would have not been motivated or found it to be obvious to combine the missing features with AirTran.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, show preferably accompany the issue fee. Such submission should be clearly labeled "Comments On Statement of Reasons for Allowance."
